Can You Afford Any but a Titan Kerosene Engine?

A present average prices for kerosene and gasoline, Titan kerosene engines save their owners about 1.1c. per horse power per hour over gasoline engines. Figure it this way. On an 8-horse engine the saving is 8.8c. an hour, 88c. in a 10-hour day, \$88 in 100 days of work. Say that is all your engine does in a year. It would cost you \$88 more than you need to pay, to run an 8-horse gasoline engine one year. That is more than a third of the price of the engine. Can you afford to throw away \$88 a year? Can you afford even to think of buying a gasoline engine, when you can get a Titan that runs on kerosene? Come in and let's talk this over. We have some interesting figures to show you.
